

2011 Webinar Series

Kindles, Nooks, iPads, Oh My!

Congratulations, you made it into the webinar!

Unless someone is speaking, you may not hear anything – so don't assume your speakers aren't working.

Please be patient with us – we are new to this and the OPAL program does have some bugs. If you get kicked off – yes, it will happen – please just log back in!

If you want to share (and we hope you will) you can use the chat or take the mic and speak.

To speak – click on and release the mic icon at the bottom left of your screen. It should turn red (and you may hear a chirp sound) and you can begin speaking. When you are finished speaking, click on the mic button again to turn it off. If you press the mic button when someone else is already talking, you will enter the queue.

Cathy Nelson is monitoring the chat room. Please type in any questions or tech problems into the chat and we'll try to help you and answer your questions.

You should be able to move around the screens/menus/webpages/buttons as you like. However, periodically the current presenter will “push” their screen to you so you can see what they are sharing.

Thank you for joining us tonight!

Heather Loy,
SCASL IT Committee Chair
